Rediscover  
**the beauty in your skin**

A REVOLUTION IN MICRO-NEEDLING

## A REVOLUTION IN MICRO-NEEDLING

Multiple factors such as stress, a poor diet, sun damage and time, affect our skin's health and beauty.

Through our micro-needling technique, you will rediscover the beauty your skin has lost over time.

### What is micro-needling?

Micro-needling is a treatment that opens thousands of micro-channels in the skin. Through this procedure you will easily achieve:

**1. Reducing the skin's imperfections:**

Promotes the production of collagen and elastin through the natural auto-repair mechanisms of the skin. These are responsible for a younger, more beautiful, healthier skin.

**2. Enhancing the effectiveness of the active ingredients:**

Transports active ingredients to the deepest layers of the skin, thus enhancing the treatment's effectiveness.

**3. Improving the communication between skin cells:**

Sends out signals that increase the communication between the cells responsible for maintaining the barrier function, pigmentation, collagen and elastin in our skin.

### Did you know...

The **results of micro-needling** are **visible from the first session**. This treatment is both **effective** and **delicate** on your skin, while being fully **compatible with your daily routine**.

## Visible results in:

-  Wrinkles
